

## Back

Alexander Ludwig

Back

Sometimes it's a sunset that takes me back  
Right back to that back road we were rollin' down  
And that strait song when it came  
Kept her holding on all night long

Back

Sometimes it's a high school that I drive past  
And I'm back to them good times growing up too fast  
Too big for a small town  
Slowing' down you don't think about that  
You don't think about that

You were Saturday nights Sunday morning church choir  
I was a highway to hell with the wheels on fire  
Yeah, we could have been something  
If I would have just stayed there  
I heard that you moved on  
It's been too long and I know that  
But I still go back  
I still go back  
I still go back

Back

To you wearing' that jean jacket I never got back  
I remember that first time right down to  
That last night, that last kiss  
To that goodbye that I can't get back  
No, I can't get back

You were Saturday nights Sunday morning church choir  
I was a highway to hell with the wheels on fire  
Yeah, we could have been something  
If I would have just stayed there  
I heard that you moved on  
It's been too long and I know that  
But I still go back

To a girl on the front porch standing in the rain  
And I looked into those blue eyes  
Said I didn't feel the same  
Yeah I should have said something  
Should have told you right there  
Yeah but you moved on  
You're long gone and I know that  
But I still go back

Yeah, I still think about it baby  
It's still driving me crazy

You were Saturday nights Sunday morning church choir  
I was a highway to hell with the wheels on fire  
Yeah, we could have been something  
If I would have just stayed there  
I heard that you moved on  
It's been too long and I know that  
But I still go back

To a girl on the front porch standing in the rain  
And I looked into those blue eyes  
Said I didn't feel the same  
Yeah I should have said something  
Should have told right there  
Yeah but you moved on  
You're long gone and I know that  
But I still go back  
I still go back  
I still go back
