

# You Make It Easier

Alexandra Savior

The night lives on  
In the shadow of the sun  
On the coldest patches of pavement  
I write this song  
From a new autumn dawn  
The place where I can find my way again

You  
You make it easier  
You  
You make it easier

My fight has gone  
All my wounds have been sewn  
My body will never be the same again  
I ride alongside a slow shooting star  
The one I know not to chase again

You  
You make it easier  
You  
You make it easier

You  
You make it easier  
You  
You make it easier
