

# Digital

Alexandra Stan

Spot you first what you walked in my frequency  
Got the thirst for your love, song even to me  
Technology sing out to me, you're the first rest returned  
Storing memory  
Sing me now, you're receiving what I'm transporting  
Electronic, super-sonic I'm like a machine  
Emergency, low battery

Oh, boy you know I got you right in my system  
And now your problem to send you transmissions  
Tonight, I got you right in my system  
A multimedia remote communication, tonight tonight

Digital digital, digital digital yeah  
Digital digital, digital digital yeah  
Digital digital, digital digital yeah  
Digital digital, digital digital yeah

It's all digital, tonight  
We direct our process like a CPU  
Some dance, no defense  
They're no substitute  
Like a machine turn up that speed  
I confess, it's complex  
But you're all I need  
Sing me now, you're receiving what I'm transporting  
Electronic, super-sonic I'm like a machine  
Emergency, low battery

Oh, boy you know I got you right in my system  
And now your problem to send you transmissions  
Tonight, I got you right in my system  
A multimedia remote communication, tonight tonight

Digital digital, digital digital yeah  
Digital digital, digital digital yeah  
Digital digital, digital digital yeah  
Digital digital, digital digital yeah

You know that it's logical what we got  
So mechanical, we're riding through the network all the ways  
You know that I lose control, electric start to fall  
And I know that I'll never be the same, never the same!

Oh, boy you know I got you right in my system  
And now your problem to send you transmissions  
Tonight, I got you right in my system  
A multimedia remote communication, tonight tonight

Digital digital, digital digital yeah  
Digital digital, digital digital yeah  
Digital digital, digital digital yeah  
Digital digital, digital digital yeah
