This is not a love song This song is not for you This is not a love song Can't you hear me singing it for you I thought that i belonged to No-one else but you The nights are sad and lonely You don't think about me neither i, you Nothing lasts forever It's all i had from you Every day Every night with you Here by my side I don't wanna be with you Now you treat me friendly But I'll never change my point of view Never get back together Nothing else to do Every day This is not a love song This song is not for you This is not a love song
