Goodbye

Enough is enough for me, baby You better get out of my life And if you come back to me maybe Remember I told you "Goodbye" I've never been so sad in all my life No one killed me before Tell me why did you do that? Oh, don't tell me everything will be alright Baby, this is the door It's too late to be sorry Oh baby, I need a passion in my life A very special kind of love Don't care about you Goodbye Enough is enough for me, baby You better get out of my life And if you come back to me maybe Remember I told you "Goodbye" There's nothing you can do to change my mind 'Cause you've played with my love It's so hard to forget it Baby, I need a passion in my life A very special kind of love Don't care about you Goodbye Enough is enough for me, baby You better get out of my life And if you come back to me maybe Remember I told you "Goodbye" I'll never forgive you Goodbye Enough is enough for me, baby You better get out of my life And if you come back to me maybe Remember I told you "Goodbye" Enough is enough for me, baby You better get out of my life And if you come back to me maybe Remember I told you "Goodbye"
