

Static

Alexis Munroe

I don't wanna be alone
In this shit hole we call a home
I find comfort in the lies you tell
And all the things you wish I'd say but
I don't

So yeah, maybe I want you
Even if it's just for the night

Your meds aren't working
And I'm losing my mind
I think we need to escape here
We need to escape

So yeah, maybe I want you
Even if it's just for the night

I can't stop thinking about you
I just wanna be exactly where you are
Do you think about me too?
Drowning in your water 'cause we drifted out too far
You know you don't wanna stop
Just tell me are you up for the ride?

I always get what I want
We don't have to do this for life

'Cause right now if I'm without you
I'll get lost in the static again

I can't stop thinking about you
I just wanna be exactly where you are
Do you think about me too?
Drowning in your water 'cause we drifted out too far
You know you don't wanna stop
Just tell me are you up for the ride?

So yeah, maybe I want you
Even if it's just for the night
I always get what I want
Just tell me are you up for the ride?
