

# There's Us

Alexz Johnson

There's me  
Looking down at my shoes  
The one smiling like the sun  
That's you  
What were you thinking  
What was the song inside your head  
There's us  
Going on about a band  
Working out how we play our hand  
I lay there dreaming  
Later all alone in my bed

If I was stupid  
Maybe careless  
So were you

Not everything is supposed to come true  
Some words are best unsaid  
Some love is not really love at all  
I'll keep everything I shared with you  
And that's enough  
There's us

Freeze-frame  
I'm not about to cry  
It's too late for us to change  
Why try  
I've got a camera  
Tucked away inside my heart

If I'm a loser  
Or just unlucky  
So are you

Not everything is supposed to come true  
Some words are best unsaid  
Some love is not really love at all  
I'll keep everything I shared with you  
And that's enough  
There's us

Somewhere between then and now  
I look away when you said we'll never change  
And if you think what might have been  
You'll lose today and we've got songs to play

Not everything is supposed to come true  
Some words are best unsaid  
Some love is not really love at all  
I'll keep everything I shared with you  
And that's enough  
There's us  
Not everything is supposed to come true  
Some words are best unsaid  
Some love is not really love at all  
I'll keep everything I shared with you  
And that's enough

There's us
