

Colour Me Blue

Alfie Templeman

I was just wondering if you're alright
You look so lonely in the street lights
You could be you could be somebody else with me if you want
I could be I could be anywhere else with you

We were just dancing round to last night
Said is this it and I said damn right
You could be you could be somebody else with me if you want
I could be I could be anywhere else with you

Do you want me to come around
Pick you up when you're feeling down
I could be I could be someone with you
Colour me, colour me, colour me blue
Do you want me to come around
Pick you up when you're feeling down
I could be I could be someone with you
Colour me, colour me, colour me blue

I was just thinking bout the good times
We used to spend out in the sunshine
You could be you could be doing it now with me if you like
I could be I could be doing it wrong but you could make it right

We were out late to watch the sun set
Something nostalgia doesn't forget
You could be you could be somebody else with me if you want
I could be I could be anywhere else with you

Do you want me to come around
Pick you up when you're feeling down
I could be I could be someone with you
Colour me, colour me, colour me blue
Do you want me to come around
Pick you up when you're feeling down
I could be I could be someone with you
Colour me, colour me, colour me blue

Do you want me to come around
Pick you up when you're feeling down
I could be I could be someone with you
Colour me, colour me, colour me blue
Do you want me to come around
Pick you up when you're feeling down
I could be I could be someone with you
Colour me, colour me, colour me blue
