Folding Mountains

Alfie Templeman

I don't look at the time, now the time's all gone
She didn't like my hair when it got this long
But everywhere I go, I see people moving on
(I'm telling you man)

Now I don't wanna die if I've got this wrong
But isn't it a sprint not a marathon?
And I don't wanna run if I'm in your paragon
('Cause really, I'm as lost as you are) Woo

I'm always folding mountains
I'm always folding mountains, baby, for you
So when you're climbing over
I tell you that's what I call having a view

I try to run away to the distant past
But every time I do, damn, it never lasts
I would have gone to space but the damn thing never ends
I think I'll go and rage in the future age
They said that if I came I could got backstage
Everybody's fine but they're not my real friends

You're far away
Won't make it today
You've been gone so long
Woo

I'm always folding mountains
I'm always folding mountains, baby, for you
So when you're climbing over
I tell you that's what I call having a view

I always bend the ocean
I always bend the ocean baby I do
But when its rising over
You know that I'll come calling you right out the blue
