

Galaxy

Alfie Templeman

You don't have to tell me where we're going
I still want to go there every day (Yeah, I do)
I've been working hours on the greatest of playlists
Even though we're talking all the way

You are my centre of gravity
Watch me fall like Rome
You take me out of the galaxy
Far away from home

Sometimes I go quiet as I wonder
Why we'd want to go back on the map (Not for me)
Hide beneath the surface and go under the thunder
Lightning striking right across the gap

You are my centre of gravity
Watch me fall like Rome
You take me out of the galaxy
Far away from home

You are my centre of gravity
You take me out of the galaxy
