

Hideaway

Alfie Templeman

(Sometimes I) Just want a good night
(Stay so shy) What do you hide from me?
(Feel so numb) I cannot feel a thing
(Feeling down) Whilst you're watching me

And when you say that you're wandering away
Is it safe, can we stay?
Are we just moving in place?
(Talk to me) Maybe, baby
(Then you'll see) You'll see I'm listening

We can be lovers till it hurts to sleep
Hurt others like we're so goddamn naive
It all runs away from me
Can't escape from my bad dreams

Won't you stay
So we can hide away?
Won't you stay
So it will be okay?

Hoping for the best, but I always get the worst
Every break is deeper, but I never find the worst
Missing how we used to be, but not like how you were to me
This nightmare's getting worse

We can be lovers till it hurts to sleep
Hurt others like we're so goddamn naive
It all runs away from me
Can't escape from my bad dreams

Won't you stay
So we can hide away?
Won't you stay
So it will be okay?

We can be lovers till it hurts to sleep
Hurt others like we're so goddamn naive
It all runs away from me
Can't escape from my bad dreams

Won't you stay
So we can hide away?
Won't you stay
So we can hide away?

We can be lovers till it hurts to sleep
Hurt others like we're so goddamn naive
It all runs away from me
Can't escape from my bad dreams
