

# One Thing

Alicia Keys

What, where am I?

What's life like on a train  
Nobody there knows your name  
As your decision changed  
Do you wish that I came

I thought you'd pick me up from work  
I waited for your truck for half hour  
I know you said you gonna  
But I never thought you'd leave

This one thing that was made for us  
Chasing us, saving us  
I take one thing over everything  
I take that thing over anybody

Square face and puppy eyes  
Found out they never lied  
Your old man lived in the sky  
Left your house with a yard  
But you went away a different try  
Found a place that's your size  
Too good to finish life here with me

I couldn't get you to say  
Why you wouldn't let me come  
What should be simple just ain't  
And it shouldn't hurt like it does

This one thing is made for us  
Won't stay with us, it ain't saving us  
But I'll take one thing over everything  
I'll take that thing over anybody

Baby, hold me, don't pick me up  
I need a compliment  
Just a touch from a friend  
I need a gentle word  
I need your company  
I'll keep

One thing that was made for us  
Chasing us, saving us  
I take one thing over anything  
I take that thing over anybody

I take one thing over everything  
I take that thing over anybody  
Oh, oh, anything  
Oh, oh, take one thing
