

No more tripping down the hull  
It seems love's back just hit our wall  
At times I'm full of spite  
But something's strong inside  
It says nothing's wrong, you're doing fine  
Doing fine

Work through it  
And get back to it  
Work through it now  
It took a real situation  
To make me feel alive  
Work through it now

All this running just to fall  
It seems my run has slowed to crawl  
Feels like nothings right  
Something screams inside  
Won't be long, you're doing fine  
Doing fine

Work through it  
And get back to it  
Work through it now  
It took a real situation  
To make me feel alive  
Work through it now

Staring out the window fall you have to pass the time  
Taking all the light that shines through, hold it in my mind

I'm doing fine

Work through it  
And get back to it  
Work through it now  
It took a real situation  
To make me feel alive  
Work through it now
