

Night and Morning

Alina Baraz

So close I can taste it
I ain't gonna waste this time
Walk through all the feelings
Right now we're not crossing lines

Shut the window, close the door
Let the world spin back and forth
Give me all the truth you're holding
What I don't know, tell me more
Down the middle, let it pour
I'ma leave my heart wide open

You fill the space between night and morning
And that's exactly what I wanted
Too many days I feel lonely for it
You know exactly what I want
This time for me

Same place, on the same page
Feels good when the beds made right
'Cause its a cold world on the outside
But it's so warm when I'm inside your eyes

Shut the window, close the door
Let the world spin back and forth
Give me all the truth you're holding
What I don't know, tell me more
Down the middle, let it pour
I'ma leave my heart wide open

You fill the space between night and morning
And that's exactly what I wanted
Too many days I feel lonely for it
You know exactly what I want
This time for me
It's all that I need

You fill the space, da-da-da-da, da-da-da-da
You fill the space, da-da-da-da, da-da-da-da

You fill the space between night and morning
And that's exactly what I wanted
Too many days I feel lonely for it
You know exactly what I want
This time for me
It's all that I need

You fill the spaces, da-da-da-da, da-da-da-da
You fill the spaces, da-da-da-da, da-da-da-da
