It's Over

Alison Krauss

The nights are so lonely and the days pass me by True love has faded, left me behind So we'll just move along and stop wasting time It's over, all over now

It's over, end of the line
It's over and you're doin' fine
It's over and over and over
I'm asking why you're leaving
It's over now

Gone are the love songs that only we knew Robbed by the cold wind that sings the night through Gone is the sweet love, tried but untrue It's over, all over now

It's over, end of the line
It's over and my desperate heart
Is still trying to find some way
Hoping you'll stay
Cause it's over, all over now
It's over, all over now
