

## Something We Forget

Alive Like Me

Stuck on the surface no I never get far  
Yeah the rocket ship backfired on the way to the stars  
Nobody's fault you can't say I wasn't honest  
Don't you be that surprised  
Don't you think it was obvious?

Don't need to love you any longer than I want to let's do  
Something less permanent  
Something we forget  
I just wanna try you and if only for the night then let's do  
Something less permanent  
Something we forget

Caught in a bad mood and it's cursed from the start  
Like a parachute accident I hit the ground hard  
Open me up and you'll find out that I'm heartless  
Don't you be so surprised  
Don't you think it was obvious?

I don't need to love you any longer than I want to let's do  
Something less permanent  
Something we forget  
I just wanna try you and if only for the night then let's do  
Something less permanent  
Something we forget

Never gonna be never gonna be the one  
Easier to see easier to breath when it's done  
Never gonna be never gonna be the one  
Easier to see easier to breath when it's done  
When it's done

I don't need to love you any longer than I want to let's do  
Something less permanent  
Something we forget  
I just wanna try you and if only for the night then let's do  
Something less permanent  
Something we forget

Something we forget  
Something we forget
