

Path Of The Brave

All For Metal

Come join us here
Let the fire warm your heart
And warm your bones
Ohoh ohoh

Lay down your fear
Let us listen to some stories
Of the past
Ohoh ohoh

Down down down
We will take the glory road
Down Down Down
we go

This will be the final fight
Maybe we must die tonight
Still here we stand and
Sing our songs together

Brothers we will keep our faith
Destiny will find its way
Our legend lingers on
Until forever

Tell them we were standing strong
And sang our songs together
On the path of the brave

Come find some sleep
You may rest now
As the guards are wide awake
Ohoh ohoh

Watch from the keep
As a blood-red sky
Turns into one more day
Ohoh ohoh

Down down down
We will take the glory road
Down Down Down
we go

This will be the final fight
Maybe we must die tonight
Still here we stand and
Sing our songs together

Brothers we will keep our faith
Destiny will find its way
Our legend lingers on
Until forever
On the path of the brave

This will be the final fight
Maybe we must die tonight

Still here we stand and
Sing our songs together

Brothers we will keep our faith
Destiny will find its way
Our legend lingers on
Until forever

On the path of the brave
On the path of the brave
