

# Sounds The Same

## All Get Out

Walking away tryna keep up straight  
Averting their eyes with an awkward wave  
Don't let em see how you've changed your gait  
A headache soars clawing out of your mind  
It's doing its best, it needs to survive  
The pressure is shit but at least you're alive

It cleans up well but you're always here  
Say I'm no nobody's local  
Not this year

Pack it in not a moment sooner  
On the mend if I'm choosing to  
Pack it in not a moment sooner  
I don't wanna go with you  
Cause I don't wanna show you who I was

Thought turns red, sees you outta the door  
You tread lightly, it's warm on the floor  
If they see you nervous they just want more  
It's back to the thing that bruised you most  
A love for a person or object or host  
You buy that lie too often ya know

Clean up well but you feel like shit  
You're in nobody's focus or this ain't it

Pack it in not a moment sooner  
On the mend if I'm choosing to  
Pack it in not a moment sooner  
I don't wanna go with you  
Cause I don't wanna show you who

So celebrate me then  
Or come on talk about  
All the good back then  
Don't wanna feel remiss  
Celebrate me then  
Or come up off of it  
All the good back there  
Don't wanna find you missing all of that

You make bail, I pick you up  
You're nobody's baby, you're enough

Pack it in not a moment sooner  
On the mend if I'm choosing to  
Pack it in not a moment sooner  
I don't wanna go with you  
Cause I don't wanna show you who I was
