

Dark Horses

All Good Things

You were the outcast
The black sheep
Personally forgot about
Memories burn to mind
Your darkest day
Medicine ran out
Friends they went away
Long inside your mind

And so you go running out from the sun
Stiller than the night
Waiting like a gun
And where you go dark horses follow you
Well we'll never know, well we'll never know, well we'll never
know

Your the one they left behind
Alone inside your mind
Listening to your thoughts
You never gave up fought on well
Hope to die, nothing left for you to prove
You are still alive

And so you go running out from the sun
Stiller than the night
Waiting like a gun
And where you go dark horses follow you
Well we'll never know, well we'll never know, well we'll never
know
Well we'll never know
Well we'll never know (oh you are my hero)

And so you go running out from the sun
Stiller than the night
Waiting like a gun
And where you go dark horses follow you
Well we'll never know, well we'll never know, well we'll never
know
