

Do It Now

All Good Things

(Let's go, let's go...)

Waiting

I see you standing in the shadows
Sitting out the battles
Watching while you're hating
As possibilities pass you by
You find you're last in line

Wishing and dreaming

But will you ever be anything?
Envious, jealous you wanna
Live your life wondering?

Take it

Nobody owes you
Now you can't be helped
Got to save yourself

It's time

The fear is rising up like fire
Like static burning through your wires
Paralyzing down your spine
It's gotta feel a lot like dying

You're nervous now you start to sweat
Your heart is beating out your chest
But there's not a minute left

Do it now

Do it right now
It's now or never
Throw it down
And make it count
Lose your excuses
Do it right now

Your turn to step into the spotlight
Time to live your best life
But you turn the lights down

Afraid of looking like a loser
Scared to change the future

You've patiently waited

But now you'll never catch up to them
You're separated
You've got to get it together again

No doubt

There's something better
But you'll never know
If you don't let go

It's time

The fear is rising up like fire
Like static burning through your wires

Paralyzing down your spine
It's gotta feel a lot like dying

(Don't let it get into your head)
You're nervous now you start to sweat
(Take a minute, take a breath)
Your heart is beating out your chest
(Better do it or you're dead)
But there's not a minute left
Do it now

Never will I ever make excuses
I been on a track of being ruthless
Negativity is so useless
I can't even use it
I'm looking at the finish line
Plotting execution
Eye be on the prize
Any other thing is foolish
So what I look like hesitating
Like I do not do this
Boy is you stupid?

I been fly
I'm used to the pressure
I'm charged up
Gotta stay energized
Locked up inside these 24 hours
And I don't waste time
I go for mine
Pass me the rock when the game on the line
Can't lock me down I cannot be confined
I do it live
I do it now
The moment is mine

It's time
The fear is rising up like fire
Like static burning through your wires
Paralyzing down your spine
It's gotta feel a lot like dying

(Don't let it get into your head)
You're nervous now you start to sweat
(Take a minute, take a breath)
Your heart is beating out your chest
(Better do it or you're dead)
But there's not a minute left

Do it now
Do it right now
It's now or never
Throw it down
And make it count
Lose your excuses

Do it now
So take a shot
This one, this second's all you got
Don't give it up
You wanna prove it?
Do it now
(Never will I ever make excuses)

You wanna prove it?
Do it now
(Never will I ever make excuses)
You wanna prove it?
Do it now
(Never will I ever make excuses)
You wanna prove it?
Do it now
(Never will I ever make excuses)
Do it now
(Never will I ever make excuses)
Right now
(Never)
