

## Lights Out

## All Good Things

Got the taste, need the rush  
One is not enough  
Another blow to the face  
Another uppercut

Feel the win sinking in  
Like it did before  
Then the high starts to fade  
Now I need some more

Hope you're numb to the pain  
Cause it's gonna sting  
Better kneel, better hail  
Cause I am the king

Take a seat, take a number  
Cause you're next in line  
Take a breath, cross your heart  
Cause you're outta time

Don't take it personal  
You're just another face to fall  
To fall

Lights out  
Line 'em up we'll knock 'em over  
Lights out  
Ready for another  
It's a blackout  
Think you can do better  
You're the next down  
We'll knock the lights out

It's a love, it's a drug  
It's a kind of high  
I'm the moth to the flame  
Need it or I'll die

Bringing out the big guns  
Cause there's hell to pay  
I'll drop the bomb  
And I'll smile as I walk away

I can take every hit  
And swallow the pain  
Cause I live for the kill  
Again and again

Another down  
Now I need a new enemy  
Step on up, try your luck  
Lay it all on me

Don't take it personal  
You're just another face to fall  
To fall

Lights out  
Line 'em up we'll knock 'em over  
Lights out  
Ready for another  
It's a blackout  
Think you can do better  
You're the next down  
We'll knock the lights out

Lights out  
Line 'em up we'll knock 'em over  
Lights out  
Ready for another  
It's a blackout  
Another down  
I'm moving to the next round  
We'll knock the lights out

Lights out  
Line 'em up we'll knock 'em over  
Lights out  
Ready for another  
It's a blackout  
Think you can do better  
You're the next down  
We'll knock the lights out

Lights out  
Line 'em up we'll knock 'em over  
Lights out  
Ready for another  
It's a blackout  
Another down  
I'm moving to the next round  
We'll knock the lights out
