

## Never Die

## All Good Things

Only seconds for decisions that last a life  
You're only walking on the sharp edge of a knife  
All you want is coming down right down to this  
Down to this  
Only human only so much you can take  
Only flesh and everybody has bones to break  
All for nothing if you come close and you miss  
Still you miss

One hand on the ground  
And one hand to the sky  
What's a little pain  
(We could crash, we could burn, maybe we could even fly)  
So many laid to waste  
So many left behind  
But what's a little blood  
(When you're playing for real and your life is on the line)

Better believe (When I crash like an avalanche)  
Better believe ('Cause you won't get a second chance)  
You're coming for me, do you believe you will never die?  
Do you believe (That you might still win it yet)  
Do you believe (That you still got one life left)  
Do you really still believe, you will never die?

Never lose if you just keep getting up  
Never fail if you say that's not enough  
Every day I gotta struggle to be on top  
To be on top  
You never dream until you open up your eyes  
You never live until you think you're gonna die  
You better give me all you got to stay alive  
To stay alive

Rise above the rest  
They all recognize  
A legend at its best  
(No one else comes close, no one's got the size)  
It's not just everyday  
I watch you fall behind  
I'd love to see your face  
(When you know that I won and you finally realize)

Better believe (When I crash like an avalanche)  
Better believe ('Cause you won't get a second chance)  
You're coming for me, do you believe you will never die?  
Do you believe (That you might still win it all)  
Do you believe (That you could play with the best of us)  
Do you really still believe, you will never die?

Legends, they will never die  
Legends, they will never die  
Legends, they will never die  
Legends, they will never die

Better believe (When I crash like an avalanche)  
Better believe ('Cause you won't get a second chance)

You're coming for me, do you believe you will never die?  
Do you believe (That you might still win it yet)  
Do you believe (That you've still got one life left)  
Do you really still believe, you will never die?

Better believe (When I crash like an avalanche)  
Better believe ('Cause you won't get a second chance)  
You're coming for me, do you believe you will never die?  
Do you believe (That you might still win it all)  
Do you believe (That you could play with the best of us)  
Do you really still believe, you will never die?

You will never die  
You will never die  
You will never die
