

Silver Shadow

All Saints

I remember gazing on this quiet night
Stars as bright as they could be
Wondering If things could every go right and
If there was a sparkle there for me

Then one star, brighter by the minute
Strange that it seems it got my mind in the middle
Reach for the star and kiss me with a slight
Maybe cast a shadow that was silver and bright

Silver shadow
A glowing shadow
Shining brightly (Keep shining brightly)
For what you see

I never had any real reasons to
Thank my lucky stars
Now I've got a pretty good reason
Cause I know I'm gonna go far

I believe In magic, I really do
With all that's happening it's got to be true
I cast a silver shadow from the kiss of the light
I knew that I was destined from the start of the night

Silver shadow
My future shadow
Trying to tell me
For the star I would be (The star I will be)
Silver shadow (Silver shadow)
A glowing shadow (A glowing shadow)
Shining brightly (Shining brightly)
For what you see

Since I'm chosen, I'm the best
I dedicate myself
I'm going to be the very best
In my shadow and the silver will remain
And the world will always remember my name

Silver shadow
My future shadow
Trying to tell me (Wait and tell me)
For the star I would be (The star I will be)
Silver shadow (Silver shadow)
A glowing shadow (A glowing shadow)
Shining brightly (shining brightly)
For all to see (All to see)

Silver shadow (Silver shadow)
My future shadow (My future shadow)
Trying to tell me (Try to tell me)
For the star I would be
Silver shadow
