

Love and Radiation

All Star United

You're electric
And I'm out in the rainstorm
You're the virus
That's running through my veins
You're a danger
Like love and radiation
Seeping into my brain

You're the one I've been waiting for
You're my rocket to the sky
You're the diving board
Standin' seven stories high
You're the thrill of love
Like a jet on fire
Push me out and see if I can fly

You're the ocean
About to pull me under
You're the surgeon
Who says it's got to bleed
You're the true love
I've always been afraid of
But you're the one that I need

You're the one I've been waiting for
You're my rocket to the sky
You're the diving board
Standin' seven stories high
You're the thrill of love
Like a jet on fire
Push me out and see if I can fly

You're the passion
Crashin' my defenses
And I'm defenceless to you

You're the one I've been waiting for
You're my rocket to the sky
You're the diving board
Standin' seven stories high
You're the thrill of love
Like a jet on fire
Push me out and see if I can fly
