

# Chemistry

All Time Low

In the heat of the summer  
I remember the ways you looked at me  
Said you wish I was older  
You had a thing for 1983  
I was born a believer  
I believe in the way you called to me  
Like a dance or a cry or  
Singing out in broken revelry

Hey!  
I really wanna see you again but I'm thinking  
Hey!  
It's time for me to just be a friend

You do something to me  
That I can't explain away  
You're killing me with chemistry  
All these words in my head  
That I probably shouldn't say  
But I'll say them anyway  
You're killing me with chemistry  
(You're killing me with chemistry  
You're killing me with chemistry)

You had love for the mixtape  
With your feet on the dashboard of my car  
You said you couldn't remember  
The last time you heard your favorite song  
We sang it out for the sceneries  
Slowly passing by out on the road  
Put your hand on my hand  
Said I know a place that we can go

Hey!  
I really wanna go there again but I'm thinking  
Hey!  
You know we never go there as friends

Honey, you do something to me  
That I can't explain away  
You're killing me with chemistry  
All these words in my head  
That I probably shouldn't say  
But I'll say them anyway  
You're killing me with chemistry  
(You're killing me with chemistry  
You're killing me with chemistry  
You're killing me with chemistry)  
You're killing me with chemistry

I don't know why  
But you just feel right  
I don't know why  
But you just feel right

You do something to me  
That I can't explain away

You're killing me with chemistry  
All these words in my head  
That I probably shouldn't say  
But I'll say them anyway  
You're killing me with chemistry

(You're killing me with chemistry  
You're killing me with chemistry  
You're killing me with chemistry)  
You're killing me with chemistry  
(You're killing me with chemistry  
You're killing me with chemistry  
You're killing me with chemistry)  
You're killing me with chemistry
