

Deliver It

All We Are

What am I giving in?
All my life it's been happening
Give me your love, and I'll give you something
Oh my God, you know
I shall wait while you take it slow
Give me your faith, and I'll give you something

That's just the way it goes
We step up, it's like a dance, you know
One leg in and the other one back so slowly, ooh

Every little single way
Every little step I take
You know that I would
I will deliver it
In every way I have to take
Every plan I ever make
You know that I would
I will deliver it to you

What do I have to show?
Nothing left 'cause you left me cold
Give me your hand, and I'll give you something
It's just the way it goes
I'm just left like a one-man show
Give me your mind, and I'll take you somewhere

That's just the way it goes
We step up, it's like a dance, you know
One leg in and the other one back so slowly, ooh

Every little single way
Every little step I take
You know that I would
I will deliver it
In every way I have to take
Every plan I ever make
You know that I would
I will deliver it to you

I will deliver it to you
I will deliver it

Trust me, I never lie to you
You know I try so hard
To give you everything I can
I will deliver it
In every little single way
Every little step I take
You know that I would
I will deliver it to you
