

Right Now

Allday

Mirror mirror tell me who the nicest
I know the answer I just need a few reminders
Start to feel like every damn Friday night is
One long unfun existential crisis
I'm not sure I know the meaning of the word
But hey, either way I'm always thinking of the worst
Now I'm going drinking and the reason is I'm hurt
But the drinking got me hurting can't stop either of 'em first
Yeah, living like everything is pre-destined
Our supplier keep on cutting like a c section
Like your newest picture, you a piece of heaven
Is that a gift for me, I like receiving presents
Like an ex jehovah, cut the questions Oprah
They can send me all the details, I'll never show up
I gotta party of my own on the east side
All the teeth white all the girls tryna' be nice

Tell her give it to me right now
Tell her give it to me right now
Uh oh oh
We in here turn the lights out
We in here turn the lights out
Uh oh oh
[x2]
I will never come

Like fucking too drunk
Our grandparents struggled but it nothing to us now
Even got my younger cousin screwed up
All the girls say they never played number 2 once
But they learn fast, white girl cornrows we lay up
Sports bras dribble while you talk like you play guard
White walled house all this art around you
And you never look at it though you know the value
View of the city avoiding peoples stares
Concentration of a coyfish voices in my head
Coitus then avoidance can you point us to the bed
Unholy union my communion of enjoyment as the bread
Gotta wonder bout the fucked up shit we do
Do you even like the bands that you listen to
Do you even like the friends that'll chill with you
When everything is cool but when you fall they disappear from view

Tell her give it to me right now
Tell her give it to me right now
Uh oh oh
We in here turn the lights out
We in here turn the lights out
Uh oh oh
[x2]

Sacrifice
Though I'll never do you right
Every time you're going under
I will be there right on time now
[x2]

6 girls in a four door
Riding round town yelling
Obscenities
Crazy ass bitches
[x4]

Tell her give it to me right now
Tell her give it to me right now
Uh oh oh
We in here turn the lights out
We in here turn the lights out
Uh oh oh
[x2]

Sacrifice
Though I'll never do you right
Every time you're going under
I will be there right on time now
