

Solid Ground

Allen-Lande

What do you have to turn?
The answers are right here
Oh when are you gonna learn to live without your fear?
The same old story you must face it once again
The never-ending chase, the never-ending game
Come let your darkness burn the fire you must keep

Search for the solid ground
And keep yourself moving
Sail your dreams beyond the sky
Don't let them pass you by
Stop living a lie
Your bitterness must die

You've got to know your heart
Look through within you night
Your soul has been torn apart
Decision made you blind, so blind
The same old weather you are standing in the rain
This never-ending rest and never-ending day
You have to take control, don't let them steel your crown

Search for the solid ground
And keep yourself moving
Sail your dreams beyond the sky
Don't let them pass you by
Stop living a lie
Stop living a lie
Your bitterness must die

Search for the solid ground
Before you know you are there
Hands above the darkest cloud
Can't fall down from solid ground
Look for the solid ground
Keep yourself moving
What goes around it comes around and round
So people will never be found on solid ground
On solid ground
