

## Circle

Allen Stone

Time - what's with all this time  
The world rotates as I fall behind  
Change - what's with all this change  
Years go by but I stay the same

Fear - what's with all this fear  
I push back but it always stays here  
Pace - how can I keep this pace  
The damage done is now taken shape

Inside of this circle there are no corners to hide  
Every line I follow lead me back inside  
Gravity pulls me from the center every time  
And gravity pulls me from my center every time

Hope - where did I lose my hope?  
Life moves quick when you're quick to choke  
Faith - where can a man find faith?  
The damage done is now taking shape

Inside of this circle there are no corners to hide  
Every line I follow leads me back inside  
Gravity pulls me from my center every time  
And gravity pulls me from my center every time

Inside of this circle there are no corners to hide  
Every line I follow leads me back inside  
Gravity pulls me from my center every time  
Gravity pulls me from my center every time
