

Magic

Allen Stone

Abracadabra
Picture perfect, I'm your camera
Kinda lady who could meet my grandma

Oh, my heart, it used to beat alone
But now I've found a metronome
Once you know, you know, you know, you know

I believe that we can make magic, ah
Baby, we just gotta keep dancin'
It's better than I ever imagined when I'm with you
I believe that we could make magic
I mix a little pleasure with passion
All my dreams seem to just happen when I'm with you

Hot damn, both of our bodies
Boppin', don't plan to stoppin'
I don't want this song to ever end

Oh, my heart, it used to beat alone
But now I've found my metronome
And once you know, you know, you know, you know

I believe that we can make magic, ah
Baby, we just gotta keep dancin'
It's better than I ever imagined when I'm with you, eh
I believe that we could make magic
Mix a little pleasure with passion
All my dreams seem to just happen when I'm with you

I could believe, believe, believe
I could believe, believe, believe
I could believe, believe, believe
I could believe, believe, believe

Baby, if you wanna can make magic
And make that I would never stop dancin'
I never, never ever imagined when I'm with you
I believe that we could make magic
I mix a little pleasure with passion
All my dreams seem to just happen when I'm with you, oh

When I'm with you, with you, with you
When I'm with you, with you, with you
