Science

Allie X

Think we can see Mercury, following the light
Driving to the restaurant while my lipstick dries
Yeah, we've got next to nothing but nothing feels so right
As stumbling through the dark with you, comets in the sky

Baby, wherever we go
Breathe a little bit closer
Drive up, right into the storm
And fade into the night

We just know how
Holding me with tightness
A beautiful alliance
Windows roll down
Yeah, we got the timing
Right down to a science

Right down, yeah right down to it
Right down to, right down to it
Right down
Right down to a science

Sink beneath the surface while reaching for the stars
The world is out of focus like all the passing cars
Breathing in the temperature filtered through your scarf
It's bigger than molecular, it's everything we are

Baby, wherever we go
Breathe a little bit closer
Drive up, right into the storm
And fade into the night

We just know how
Holding me with tightness
A beautiful alliance
Windows roll down
Yeah, we got the timing
Right down to a science

Right down, yeah right down to it
Right down to, right down to it
Right down
Right down to a science

Something about the way we ride
I think we might be in our prime
We're brighter than a socialite in the dark
Something about the way we ride
I think we might be in our prime
We're brighter than a socialite in the dark

We just know how
Holding me with tightness
A beautiful alliance
Windows roll down
Yeah, we've got the timing
Right down to a science

Right down to a science
