

# Stay Green

Allie X

Been missing the way the world used to look  
Been missing the calm before everything shook  
There was a time in my life, it was almost a dream  
The blues were so blue, the greens were so, so green

And memories weigh, they're a double edged sword  
There's the ones that you need and the ones you can't afford  
Oh, then you can't go back, even if you try  
And no one asked me for this advice, but

Erase your nerves  
Soften your heart  
This life, it makes  
You hard enough

You gotta stay green as long as you can  
Keep dreaming until the end  
When someone breaks another wish  
You let it just die  
Then you can stay forever green  
Beautiful child

And bones they creak, they snap and they break  
My eyes get weak when there's just too much to take  
You know, your hair gets course, your hands get dry  
It's hard to ignore the harshness of time

Reset your nerves  
Soften your heart  
This life it makes  
You hard enough

You gotta stay green as long as you can  
Keep dreaming until the end  
When someone breaks another wish  
You let it just die  
Then you can stay forever green  
Beautiful child

You gotta stay green as long you can  
Keep dreaming until the end  
When someone breaks your latest wish, let it just die  
When someone tells you who you are  
Don't internalize  
Sometimes it hurts, it hurts so bad  
But baby, that's life  
So try your best to stay forever green  
Stay forever green  
Yeah, you can stay forever green  
Beautiful child  
Stay green
