

# The Orphan Breed

Allt

Oh, so you're ignoring the force field?  
Well, in this bubble you'll die  
Come on and test your wings then  
You all will drop like flies  
I see through your pathetic features

All you are  
All you are  
Thoughts, flesh and bone  
Say what you want  
But your emotions won't bite on me  
No fucking sympathy  
Leech

You speak in tongues  
You always claimed to be the chosen one  
But we see through your masquerade  
You're not providing shit  
You're just a fucking disease

Kneel  
Cede  
Yeah

Self-proclaimed superior race  
The water's way above your heads  
You've been here now for far too long now  
Your weakness shines when you bleed  
Just like a bird without its wings  
Crawl your way back to where it all began  
The orphan breed  
Forced defeat  
Suffer in eternity

Say what you want  
But your emotions won't bite on me  
No, it's never ever gonna be the same  
Is that regret that I see in your eyes today?  
Playing God through the years has eventually  
Lead you to the point when you become the disease

You speak in tongues  
You always claimed to be the chosen one  
But we see through your masquerade  
We're the wolves in a world of sheep

Cede  
Crawl your way back

Self-proclaimed superior race  
The water's way above your heads  
You've been here now for far too long now  
Your weakness shines when you bleed  
Just like a bird without its wings  
Crawl your way back to where it all began  
The orphan breed  
Forced defeat

Suffer in eternity
