

# Stand Together

Aloe Blacc

Now it's obvious we don't see the world the same  
You've got your point of view on what you feel is true  
No, we don't have to play that silly game  
Of who's more right than who  
But even if you do

I'm gonna try, try, try to listen to you  
Give you my, my, my undivided attention  
We won't see eye to eye on some things  
But maybe we can agree on one thing

We can change this world forever  
If we all just stand together  
Put our differences aside  
Swallow all that foolish pride  
Can't you see it's now or never?  
Don't we all deserve much better?  
Won't take long to realize  
That we're all the same inside if we stand together

If we stand together  
If we stand together  
If we stand together

There's folks out here living in a world of pain  
Just trying to make it through  
No clue on what to do  
Too proud to ask for help, but don't be ashamed  
To reach out for my hand  
I'm sure I'll understand

And I'm gonna try, try, try to listen to you  
Give you my, my, my undivided attention  
We won't see eye to eye on some things  
But surely we can agree on one thing

We can change this world forever  
If we all just stand together  
Put our differences aside  
Swallow all that foolish pride  
Can't you see it's now or never?  
Don't we all deserve much better?  
Won't take long to realize  
That we're all the same inside if we stand together

If we stand together  
If we stand together  
If we stand together
