Ride Away

Alpha Rev

What's my story would you
Like to know it
Open ended, always spend it,
Life pretended now
What is this I am looking
For
A place to
Find a space that keeps me
From the voice underground

Your ride away
'cause you don't understand
You ride way
You gotta get away from
Them
What is there to lose
What is there to lose
If you really want to start
It over
What is there to lose
Every day we get a little
Older

Place your finger on my
Bleeding heart
I'll fall apart if you don't
Come and heal my bloody
Fist
Careful, careful, though I am
Only here for
Losing control of everything
That I could ever miss

Your ride away
'cause you don't understand
You ride way
You gotta get away from
Them
What is there to lose
What is there to lose
If you really want to start
It over
What is there to lose
Every day we get a little
Older

No matter where I go
These thing will always find me
I can't just lose myself again
No matter what I say
These things will come between us
I can't just lose myself again

Your ride away
'cause you don't understand
You ride way
You gotta get away from

Them
What is there to lose
What is there to lose
If you really want to start
It over
What is there to lose
Every day we get a little
Older
