

## Call Me

Alphaville

You know I've never been in love, just read some books about it  
You know I've never been with you before  
But we can meet each other soon to taste a moment lost in life  
The touch of fading memories  
So if you want me in your life I swear I won't forsake you  
And play this tune to all the fools who fly where angels fear to tread

Just call me and I'll make it, I'll fill the black holes in your heart  
Just call before you break it  
Just call me and I'll make it, I've been around right from the start  
Just call me and I'll take it to keep it save ...

I know you better than myself, I've been around for so long  
Your posters hanging on my wall - untouched  
And all these bitches in your life, they made me sick and tired  
I locked them up inside my mind, so deep  
And now the time has come for you and me to keep our promise  
This is your lucky day, the hunter's captured by the game at last

Just call before we break it and fill the black holes in my heart  
Just call and I will take it  
Just call me & we'll make it, you should've known we'll never part  
Just call and don't forsake it, we'll never part
