

chasing safety

alt.

Your body's tired and coming down
Your heart is frayed and falling out
It's time for change I see your chains
And I know your pain is tearing you up from the inside out

Take a hold of me
I swear you've given up the fight like candlelight in the wind
'Cause it's a war I don't think you can win anymore
A distress call I can help you get back to shore

I won't let you dangle to your fate
I'll pull you back to where you want to be
Where it's safe, you need to break these chains
And I'll help you get back

I just want you to feel safe, come back

Take a hold of me
I swear you've given up the fight like candlelight in the wind
'Cause it's a war I don't think you can win anymore
A distress call I can help you get back to shore

Tell me where you are and I'll come running to save you
Tell me where and I'll come save you
Tell me where and I'll come save you

Take a hold of me
I swear you've given up the fight like candlelight in the wind
'Cause it's a war I don't think you can win anymore
A distress call I can help you get back to shore
