

nothingwithoutyou

alt.

You asked me how I was
I said I'm feelin' fine a little dead inside
But nothing you didn't know
But you didn't know

You only told me how you feel
You never gave me time to heal
Just said I wasn't enough
I'm never enough

I sank into the ground you kicked me while I'm down and told me to my
face my life means nothing without
I sank into the ground you kicked me while I'm down and told me to my
face my life means nothing without you

My life means nothing without you

And you know that I wished that you never said it
You know that we're both gonna live to regret it but
You can't really swallow the words cause they make me sick
I just wanna know what you really said it for
I just wanna know what you really said it for
'Cause you left me here with a broken heart
You left me here with a broken heart

My life means nothing without you
My life means nothing without you
My life means nothing without you
My life means nothing without you

I was yours wallowing in my own thoughts I
I was yours I will never let you tear my heart out
I was yours wallowing in my own thoughts I in my own thoughts I

I'm speechless I'm breathless I'm nailed to the floor
I gave you the world and you gave me no choice
I'm scared of your reasons I'm scared to believe
The devil inside you is raging in me
A moment of weakness a lifetime of pain
I've been through this once I can't do it again
You've broken me open you've cut me in two
I still can't work out what I did to deserve you

I was yours wallowing in my own thoughts I
I was yours I will never let you tear my heart out
I was yours wallowing in my own thoughts I in my own thoughts I

My life means nothing without you
My life means nothing without you
My life means nothing without you
My life means nothing without you
