

# Outright

Alter Bridge

Never be afraid  
No never fear at all  
But I must be on my way  
But you must carry on

But if I do not make it back again  
Please know that I have loved you till the end

And one last thing before we say goodbye  
Never say die

You don't slip away  
Your heroes come and go  
But I hope that you can face  
Your shadows on your road

I know you fear the end is going to come  
But you my friend, you've only just begun

And one last thing before we say goodbye  
Never say die  
Don't let them keep you down  
Hold your head up high  
Never say die

Somewhere in the distance  
It's calling me home  
But in case I won't see you again  
Always care, be resilient  
Never let weakness show  
Keep fighting till the very end
