

Many Mirrors

Always

Now that we've passed through many mirrors
I can't believe we're still the same
Now that we've passed through many mirrors
I can't believe we're still the same

Light years away
And you're got so much life to offer in you
Wild out of the place, you called me
Someone figured it out before you
Long time flame
And you're got so much life to offer in you
Wild out of the place, you called me

Now that we've passed through many mirrors
I can't believe we're still the same

Light years away
And you're got so much life to offer in you
Wild out of the place, you called me
Someone figured it out before you
Long time flame
And you're got so much life to offer in you
Wild out of the place, you called me
(You called me)

Wild out of the place, you called me

Now that we've passed through many mirrors
I can't believe we're still the same
Now that we've passed through many mirrors
I can't believe we feel the same
