

## With It

## Always Never

I told her she could ride it out  
I'm not tryna love I'm tryna find my way out  
I didn't mean to do it but I broke a couple hearts on my way down  
They wanted some more but I couldn't let that shit play out  
Let it play out  
Let it

She with it, she with it, she with it  
But tells her friends something different  
She with it, she with it, she with it  
A little sad won't admit it  
She with it, she with it, she with it  
Anything for a minute  
She with it, she with it, she with it  
Until she ain't fucking with it

You get honest when you smoke some (honest when you smoke some)  
You smoked some  
A little vicious babe you on one  
Yeah you on one  
I don't wanna be the reason  
So maybe you should go  
I don't wanna talk about this no more  
I don't wanna lose myself for you

She with it, she with it, she with it  
But tells her friends something different  
She with it, she with it, she with it  
A little sad won't admit it  
She with it, she with it, she with it  
Anything for a minute  
She with it, she with it, she with it  
Until she ain't fucking with it

Still dealing with my own shit  
I've been in love for so long but now I'm fucking over it  
I tried to make sense of what went wrong before this  
She was a thot  
Who woulda thought  
I was just too invested  
Too invested

She with it, she with it, she with it  
But tells her friends something different  
She with it, she with it, she with it  
A little sad won't admit it  
She with it, she with it, she with it  
Anything for a minute  
She with it, she with it, she with it  
Until she ain't fucking with it

I don't wear my heart on my sleeve  
Like I, used to  
But now I'm that guy  
I'm confused too
