

Not Ready to Wake Up

Aly & AJ

Something new, honeymoon
We wake up when the sun goes down
With you I've got no doubt
Lay by me, breathe in you
Oxygen is overrated
So elevated
There's no need to try
Kill a little time with me
Lover, close your eyes
Stay in paradise with me
Not ready to wake up
When real life feels like dreaming
Not ready to wake up
When your arms feel like freedom
Don't bring the shades up
Let's keep the night from leaving
I got all that I need
And it's right here with me
So many emotions
So many emotions
When I'm with you, it's a mood
I can't control it, I'm rollin
Like waves in the ocean
When you pull me close, I just know
I don't need no medication
You're my salvation
There's no need to try
Kill a little time with me
Lover, close your eyes
Stay in paradise with me
Not ready to wake up
When real life feels like dreaming
Not ready to wake up
When your arms feel like freedom
Don't bring the shades up
Let's keep the night from leaving
I got all that I need
And it's right here with me
So many emotions
So many emotions
And I know that I know that I know that I know that I want it
And I know that I know that I know that I know that I got it
And I know that I know that I know that I know that I want it
And I know that I know that I know that I know that I got it
And I know that I know that I know that I know
That I want it (So good that I can't explain it)
And I know that I know that I know that I
Know that I got it (Content in my situation)
And I know that I know that I know that I know that I want it
Not ready to wake up
When real life feels like dreaming
Not ready to wake up
When your arms feel like freedom
Don't bring the shades up
Let's keep the night from leaving
I got all that I need
And it's right here with me

So good that I can't explain it
So good that I can't explain it
