

# Black Rover

AmaLee

A simple stage  
A wish bringing out our thirst  
A thread pulling every nerve  
Until you find a soul to match your strength

As the summit comes to life  
The horizon's in my sight  
But I'm falling into the sky

So much hope is here in both our hands  
As we brave a storm of waves and -  
Still we've yet to spread our wings out  
But the time is now -!

Get down! We won't let you go!  
This time, can you bring us down?  
Back up! Fly far through the sky  
BLACK ROVER!

Let's go! All together now  
And at last! This world can't slow us down  
For now, let's dye it all in black  
BLACK ROVER!

Another play  
I've seen it so many times  
You see it too, but lack the sight  
Why do I even try... when it's all the same

Everyone recites the script  
But I'm not meant to follow it  
Won't sit back, I won't blend in with the cast  
You won't see me hide behind a mask

So much hope is here in both our hands  
As we brave a storm of waves and -  
Still we've yet to spread our wings out  
But the time is now -!

Get down! We won't let you go!  
This time, can you bring us down?  
Back up! fly far through the sky  
BLACK ROVER!

Let's go! All together now  
And at last this world can't slow us down  
For now, let's dye it all in black  
BLACK ROVER!

As more join and stand beside me  
The void doesn't feel so empty  
I know there is much more in store  
Let's open that door -!

Just open your eyes, like us  
Just open your hearts, like us  
Just open the world, like us

We know we are reckless

Just open your eyes, like us  
Just open your hearts, like us  
Just open the world, like us  
Don't stay! Don't blame! (That's right!)

Get down! We won't let you go!  
This time, can you bring us down?  
Back up! Fly far through the sky  
BLACK ROVER!

Let's go! All together now,  
And at last this world can't slow us down  
For now, let's dye it all in black  
BLACK ROVER!

As more join and stand beside me  
The void, it doesn't feel so empty  
I know there is much more in store  
Let's open that door -!

Let's go next stage
