

# Hourglass

AmaLee

Breathing the smoke and dust  
Rise up the seconds are racing back  
Racing back  
I'll be here when we meet the end  
But for now I'll send  
A message back in time

You took my hand  
Said we were skybound  
And for a moment  
Time stood still  
This is our vow

This love that we found  
It's gonna break us  
And when it does  
We'll jump back  
We had forever  
Baby, it's unstopabble  
Because 'forever' is impossible  
Never forget me never forget me

Guess our hourglass is running out of time  
You throw your sickles and stones  
You know your words can bleed through my bones  
Well I guess that's not enough

Keep on tryin' break me down  
I was born with fire  
Come on knock me to the ground  
Maybe then you'll see how  
Every blow you've dealt me  
Set me free  
I'll remain unbroken

You took my hand  
Said we were skybound  
And I believed you  
As time stood still  
Our spoken vow

Those lies that you wound  
They're gonna break us  
And when they do  
We'll jump back  
We had forever  
Baby now it's in the past  
Our once 'forever'  
Wasn't meant to last  
Never forget me never forget me

Guess our hourglass is running out of time  
You took my hand  
Said we were skybound  
And at that moment

It all came back

Our spoken vow  
Those lies that you've wound  
They're gonna break us  
But never me  
You took my hand  
You took my hand
