

I'm Invincible

AmaLee

Now, let worry fall away
No fear allowed to stay
My wish is now your dream
And my hope never-ending
When clouds build up inside
My song can clear the sky
You know I'm invincible
Everything is alright

My voice carries birds in flight
With every note, they go higher and higher
See how I move with such grace
Just like a dancer on the stage
Your voice carries life within
Calls me to action again and again
If you're hurt and you need me
I'll always be there, I swear
I'll always protect you

We'll have a chance to go to brand new heights
You and I, unstoppable when we're together
We can have it all
A fire burns within our hearts

Now, let us go hand in hand
To a life that lies ahead
All of our hopes and dreams
Can bring happiness when we're in sync
I've always felt this warmth from you
No one gives affection like you do
You make me invincible
When you're here by my side

Though this path has twists and turns
If I can walk it, there's so much I'll learn
I know it's the long way round
But there's no way I'm backing out now

See all my flowers? I'll tend to each one
Don't care if I feel just a bit overcome
We're obliged to do everything we want
Or fester inside
Don't let this moment die
We've got to try!

Soon we will see a brand new era dawn
The day will come
The world is waiting for someone
To change the way it's done
We keep repeating our mistakes
The cycle's got to break
It's time to work through all the pain
And be the ones to change
Let's reach as high as we can go

Now, has worry gone away
And fears all been assuaged?

My feelings may be strong
But there's power when you have passion
When fog builds up inside
My song can clear your mind
Everything will be alright
You know I'm invincible

Now let us go hand in hand
To a life that lies ahead
Your wish is now my dream
And my hope never-ending
Even your weakness is unique
There's no one else like you
You're what we need
Shine a light into the dark
Be a beacon

Love, the feeling that I get
Every time I think of it
The dream that I once had
Still beats strongly in my heart
Say it once again
Say it once again and again
Everything is alright
When you're here by my side

Strong with you by my side
