

Let It Out

AmaLee

Let it all out
Let it all out
Never feel you need to
Act brave when you're hurt
On a white wall
Someone has drawn
A sunflower that's so delicate
It sways in the wind

No one really knows what's inside
But you know don't gotta hide
In life, you win and lose
But those are the rules
Upon this endless road
You're walking still

And some days you might feel lonely
You may wanna cry
But swear that you'll
Hold on

We take our scars
And make them stars
Let them shine up in the sky
This light is ours
And it will burn on
No matter where we are

Even if we happen to lose our way
We will always be together
So, hey, come with me
We will shine a little stardust on a new day

Let it all out
Let it all out
It would seem that there
Are many things you seek
But, don't mind it
No one's perfect
If we were then I don't
Think we would have met
Woah

No one really knows for certain
What if they would pull the curtain?
So all this time I've held a knife behind my back
Just in case my love wears thin

But you know it's hard to stay strong
When you lie and say you're fine
It wears you down

I know you're scared
This fear we share
But we gotta live our lives
You're not alone so keep on smiling
And riding on that wind

You and I are reaching out our hands
And, as long as we're together
Oh, hey, come with me
We will shine a little stardust on a new day

What if we discovered that the things we believed all this time are wrong?
Do you just pretend that the sin is fine and let it eat you up inside?
I thought I lost everything
But, that's when you reminded me
That you're always here
Whenever I need you most

Ooooooh oh
Ooooooh oh
Ooooooooooooooh

We take our scars
And make them stars
Let them shine up in the sky
This light is ours
And it will burn on
No matter where we are

Even if we happen to lose our way
We will always be together
So, hey, come with me
We will shine a little stardust on...

I never want
A day to come
When it's time to say goodbye
But, life goes on
And that is something
There is no running from

Even if we happen to lose our way
We will always be together
So, hey, come with me
I will always stand by you
That one thing won't change
