Far away
Far away
All my thoughts are far away
And I only wish we could go back
To a simpler time
When laughter warmed the world and filled our lives

I'm left picking up the broken shards
All that is left within my shattered heart
Every part of me is broken glass
Every memory I see it clear
Everything we once held dear
But I won't know until it all disappeared

The world without you is an endless maze
A jigsaw puzzle laid out on a grave
Its missing pieces I will never find
They are lost to time

You have a place
In my heart, no one could take
They could try but you, they'd never replace

Just stop time
Just stop time
Can we find how to stop time
Carve your silhouette in my chest and upon my flesh
Then take my forgiveness
Once again
And again
I'd give everything again
If it meant that I could give life
To this wish of mine
And see your smiling face just one more time

It's by this chain we call reality
That we are linked together you and me
And although our dreams we may never meet
I will still believe
We'll search the world
Every day and every night
Until we find a light to shine on our path

Far away
Far away
All my thoughts are far away
And I only wish we could go back
To a simpler time
When laughter warmed the world
Just stop time
Just stop time
How I wish we could stop time
Carve your silhouette in my chest and upon my flesh
Then take my forgiveness
Once again
And again
I'd give everything again

If it meant that I could give life
To this wish of mine
And see your smiling face just one more time
Yeah
Just one more time yeah
Oh
Just one more time
