

Violent nights, vivid lights
And I don't know where I'm going
Passing red, passing out
That's the whole damn beauty of it
Passing skyscrapers now
I'm the highest in the city
Misty clouds in the sky
Like the moon just hit it with me
Looking at the colours got me woozy
Wheels spinnin' fast they ain't moving
Wavy GTA in my new wraith
Rearview mirror looking ruthless

Mmmmm
It's a new feel need more dosing
Mmmmm
It's a new feel need more dosing

Flashlights on me need to go for it
Fast ride, speeding, Tokyo
I just pushed the button, on with the starshine
Flashlights on me need to go for it

Flashlights on me need to go for it
Fast ride, speeding, Tokyo
I just pushed the button, on with the starshine
Flashlights on me need to go for it

Honestly, ey, I might go insane
Tunnel vision yeah I gotta get away
Pedal down, 160 MPH
Trippy post love, was it all in vain?
Riding through, hit the speed bumps
Getting lost, I just need your love
Why do you hit decline when I call
Is it someone else or no?
I just wanna know

Mmmmm
It's a new feel need more dosing
Mmmmm
It's a new feel need more dosing

Flashlights on me need to go for it
Fast ride, speeding, Tokyo
I just pushed the button, on with the starshine
Flashlights on me need to go forward

Flashlights on me need to go for it
Fast ride, speeding, Tokyo
I just pushed the button, on with the starshine
Flashlights on me need to go forward
