We've had our share of joy and pain
But we both get up so high
Just to come down again
And now you're like a rocket disengaging

Everything of yours I've gathered up When you come 'round here You won't be drinking from my cup And I've been fast asleep But now I'm waking It had to happen sometime

I'm rising up
I'm right over you
So fly away
Cause that's the best thing you can do
Don't keep telling me how I should feel about us
I don't feel anything, baby

There was love, I can't deny
But your arms can't hold on to me
So just keep them by your side
Your eyes won't always be spilling over
Yeah, it had to happen sometime

I'm rising up
I'm right over you
So fly away
Cause that's the best thing you can do
Don't keep telling me how I should feel about us
I don't feel anything, baby

Maybe we could have grown
But if I made a mistake
God knows, I found out without you
Don't fool yourself

All those things you thought we'd see Well, you gonna have to save them for someone on me One day you will move on and there you'll be forever Forever, forever

I'm rising up
I'm right over you
So fly away
Cause that's the best thing you can do
Don't keep telling me how I should feel about us
I don't feel anything, baby

Oh, I'm rising up
I'm right over you
So fly away
Cause that's the best thing you can do
Don't keep telling me how I should feel about us
I don't feel anything, baby
