

Blame It on the Mistletoe

Amanda Shires

Blame it on the mistletoe
Ain't no better excuse
For all the things that made me
Lean in for a kiss, like I did

I could say that I didn't know
You could say you got too close
The way I remember it, you got me out of my clothes
I wrapped around you like a bow

Who says this isn't Christmas Eve?
There were stars and there was chemistry
We were just standing around
Then the snow came falling down

This kind of thing can happen any day
So what it happened yesterday
December 25th? We can call it what it is
What it was, the best merry Christmas
When you showed up

At my door under the mistletoe
Looking like you were lonely, too
Maybe we had too many drinks, but that's not true
It's a good excuse

I admit I was feeling a little ho-ho-hopeless
Thinking this crush was just one sided
Then you came by, maybe reindeers really fly
We stayed up all night

Who says this isn't Christmas Eve?
There were stars and there was you and me
We were just standing around
Then the snow came falling down

This kind of thing can happen any day
So what it happened yesterday
December 25th? We can call it what it is
What it was, the best merry Christmas
When you showed up

This kind of thing can happen any day
So what it happened yesterday
December 25th? We can call it what it is
Or what it was, the best merry Christmas
When you showed up
